

José Campos

Industrial Designer

Industrial Design Engineer and UX/UI Designer with a **strong foundation in user-centered design**, digital product development, and cross-functional collaboration. Specialized in creating intuitive, **research-driven interfaces and visual systems**. Skilled at translating user needs into high-impact solutions across mobile apps, websites, and data dashboards. Adept at leading design initiatives, conducting UX research, and managing creative teams. Fluent in English and Spanish.

Core Competencies

- **UX/UI Expertise** – Skilled in wireframing, prototyping, and interface design with a focus on accessibility and intuitive navigation.
- **Creative Problem Solving** – Adept at developing innovative solutions that combine aesthetic appeal with functional impact.
- **Assertive Communication** – Effective in presenting ideas and leading stakeholder discussions with clarity and purpose.
- **Goal-Oriented Mindset** – Highly committed to meeting objectives through structured planning, follow-through, and quality execution.
- **Visual & Graphic Thinking** – Strong conceptual visualization and storytelling skills to translate complex ideas into engaging visuals.
- **Design Strategy & Research** – Applies design thinking and UX research methodologies to ensure user needs guide design outcomes.

Education

- **Bachelor of Industrial Design Engineering**
Instituto Tecnológico de Costa Rica (TEC) – 2020
- **Specialization in Creative UX/UI**
LCI Veritas – 2024
- **Master's in User Experience Design (Ongoing)**
UNIR – Expected 2026

Skills

- UX/UI Design & Research**
- Wireframing, Prototyping, Design Systems
 - Heuristic Evaluation, User Testing
 - User Flows, Journey Mapping
 - Surveys, Interviews, Focus Groups

- Tools & Software**
- Figma, Adobe XD, Sketch, InVision
 - Illustrator, Photoshop, InDesign
 - SolidWorks, Keyshot, OnShape
 - After Effects, Premiere Pro
 - Microsoft Office & Google Workspace

- Soft Skills**
- Team Leadership
 - Communication & Collaboration
 - Creative Problem Solving
 - Stakeholder Management

Languages

- **Spanish** (Native)
- **English** (Advanced)
- **Portuguese** (Beginner)

Work

- **UX/UI Designer – App Project**
SJO Turismo / Municipalidad de San José & TEC
2020-2022
 - Designed a tourism app for the Centro Histórico of San José, promoting historical and cultural exploration.
 - Collaborated with multidisciplinary teams from TEC and the local government to ensure accurate and inclusive design.
 - Developed wireframes and prototypes for mobile and web interfaces, focusing on accessibility and user engagement.
- **Creative Design Lead / Community Manager**
FEITEC – Federación de Estudiantes, TEC
2021 – 2022
 - Managed a team of 5 creatives to produce content for social media campaigns and events, ensuring alignment with the organization's identity.
 - Led strategic planning and execution of audiovisual communication projects to engage the student body.
 - Developed templates and branding assets to streamline design processes.
- **UX Researcher**
SIT
2023 – 2024
 - Conducted UX research to support the full redesign of the company's website.
 - Led a multi-phase research plan that included surveys, focus groups, and usability audits.
 - Synthesized findings into actionable insights, resulting in improved site architecture and increased user satisfaction.
- **Lead UX/UI Designer**
Grupo Financiero CAFSA
2022 – 2024
 - Led UX/UI redesign of the CAFSA website and mobile application, improving navigation, accessibility, and user engagement.
 - Conducted UX research through user interviews, journey mapping, and usability tests to guide digital product decisions.
 - Developed and implemented a design system to ensure brand and interface consistency across digital platforms.
 - Automated client-facing processes, reducing operational friction and improving service speed.
- **UX/UI Designer**
Walmart Central America (D&A)
2024 – Present
 - Designing technology platforms to get a better experience for Walmart associates and improve their performance.
 - Apply UX methodologies (user interviews, feedback loops) to ensure solutions meet real user needs and align with stakeholder goals.
 - Collaborate with data analysts and business managers to transform complex datasets into actionable, readable visuals.
